

# HELP DEVELOP OUR NEURO REHAB SERVICES

If you have an experience of, or an interest in, local neuro rehabilitation care we would like your help and support in developing our services.

In Worcestershire we provide a range of neuro services from a few different sites. A complex neurological condition results from disease, injury or damage to the body's nervous system, and includes conditions such as Parkinson's, Cerebral Palsy and Motor Neurone Disease. There is a wide variety of neurological conditions and people have very different experiences which we want to hear as we start thinking about developing an improved service.

We want local people who have experience of these conditions to help us develop a better, more equitable service for future patients and families/carers. We recognise there have been previous engagement events and activities aiming to support these services and this will seek to build on the views and feedback we have received.

**For more information or to reserve your place email [b.banner@nhs.net](mailto:b.banner@nhs.net) or call 01905 681495**

## How to get involved

To start the conversation we are holding a couple of events for people to come along to, hear more about what we do, and give views on how things could be improved.

### Events:

26<sup>th</sup> February 2020,  
from 2pm until 4pm  
@ St Peters Baptiste  
Church, Eden Close,  
Worcester, WR5 3TZ

5<sup>th</sup> March 2020, from  
2pm until 4pm @ BHI  
Parkside, Stourbridge  
Road, Bromsgrove, B61  
0AZ
